Each Study Tour is a directed learning experience for a group of student participants. After several periods of classroom sessions featuring faculty, students embark on site visits to their destination of choice, meeting with industries, NGOs, Hospitals and government leaders, as well as local people. Through these visits, students are able to build on the preparatory course work with an in-depth exploration of industries, companies, NGOs, Hospitals and local places they have visited.

Learning

“Only curious always helps us to learn something from each moment”, this has always exited us more than intelligence quotes. We had learnt several points during the whole process of study tour with the guidance of our learning teachers. These points are classified into two categories i.e. Personal and Professional.

Personal Learning

Courtesy towards work is necessary; efforts will come automatically and leads to success.

Learning is only based on the sharp observation & a great proclivity to do something and observation is one of the best techniques for learning.

Learning is a part of our life so it can be found anywhere.

We believed that wastage is nothing but if we use wastage (vast+age), we can survive our whole life with the help of wastage.

To be an asset of an organization, we should be a loyal and committed towards our work.

Professional Learning

We learned professionally from visit of various organizations and our professional teachers during study tour. These are as follows:

We have learnt about management system, management functions, leadership & workforce management, organizational system, management policies, organizational cultural & climate, & many more.

We understood social securities which are given to the workforce of the organization i.e. Gratuity, PF, Pension, VRS scheme etc.
We learnt professional & managerial behavioral etiquettes & attitudes with efficient work ethics and values.
